Bookkeeping (Minijob) in a Startup

Who we are

We are VIPERdev.io - we are founders, innovators and coders who strive to bring new products to market *fast*. We not only build software, we solve problems - that mentality makes partnering with us a lot more successful than partnering with e.g. an outsourcing agency. We help our clients with a time to market of down to 30 days for software products and we aim to launch own products every couple of months in the near future.

Our office is at the StartupDock 5 minutes from the TUHH.

What we need done

We are looking for someone to take over bookkeeping, financial projections for the company and related things.

What you can grow into - if you want:

- Translating (english | german, articles)
- Marketing/Social Media
- Blogging
- Coding
- UI/UX Design
- Something we haven't thought about?

Who we're looking for

We're looking for someone who can think autonomously and "gets stuff done".

Basic requirements apart from that:

- Fluent german and english
- Being able to use an online office suite ^^

What we offer

- **Completely flexible work hours and locations** (work wherever you are, whenever you want). Try to come in to the office once a week for a chat - but as long as we can work together productively we're not a fan of 9-5 restrictions. #nobullshit
- Flat hierarchy. Need a budget? Want to change how we work together? We embrace change and suggestions and we'll give you the tools you need to achieve awesome stuff.
- Support for your **own startup idea** if you want to.
- A **company bike** if you want one - less cars, more muscles.
- Coffee, water ^^

Formalities

- German "minijob" (450eur), 10hrs/wk
